

Digital vs. Conventional Denture Fabrication

Mountain Digital Dentures are milled using the finest materials available

Advantages of Milled Digital Dentures over Analog Denture

Improved Accuracy

No risk of process error, warpage, or shrinkage

Streamlined Appointments

Less appointments needed and a faster turnaround time means patients receive their final prosthesis sooner.

Predictable Try-in - The try-in appointment is completed with a printed version of the final denture, enabling increased stability, accuracy, and an easier clinical evaluation.

Digital Record - Denture files are stored and readily available if needed in the future.

Deliver Dentures in as few as 3 appointments!

1. Copy Denture: Scan or Impression
2. Try-In: Mountain Printed Denture
3. Delivery: Mountain Milled Denture

It is all about the material

- Fully processed
- Non-Porous
- Durable
- Repairable/Relinable
